

## WHY TMI UV?

**Stronger output – 60 mJ/cm<sup>2</sup> versus 30 or 40 mJ/cm<sup>2</sup>**

Rugged construction – HDPE versus stainless steel.  
HDPE stands up to harsh chlorine and salt water.

Affordable

NSF50 Certified

Straightforward installation

Plug and Play

Simple on-going maintenance – no tools required

Minimal electrical consumption  
.25 Amps @ 240v per lamp

13,000 hour bulb life

Strong warranty – 5 year limited

Tech support available

Backed by TMI and 20+ years in commercial aquatics

UV Sanitation is a popular secondary disinfection system for commercial pools and spas. The benefits are numerous, from increased water quality to chloramine destruction and immediate micro organism destruct.

TMI field tested their UV systems for 3 years before launching their UV systems.

*“Water has been really nice since installing E-UV®. We’re believers in this system and are working to get UV added to all our bodes of water.”*

**Jeremy Davis,  
Lifetime Health & Fitness Casper  
WY**

*“We are very happy with the results of installing the TMI UV system for our pool. Our Combined Chlorined levels are now stable with readings between 0.0 –0.2”*

**Mary Whidden,  
Erickson Living, Linden Ponds, MA**
